Pick smarter. Build faster. Win internal.

A judge-ready guide to the **Top 20 Software PS** for SIH 2026 — scored on **Quality × Crowd × Differentiation**, de-weighted for your **05 Sep internal** (`freeze = 12 days away`). No hype. Just signals.

WHY THIS DECK WINS

Internal judges ≠ portal crowd.

We halved Crowd weight `0.25→0.10` and boosted Quality `0.40→0.50` for 05 Sep. You pitch execution, not scarcity. National backup is still in v2.

V3 = INTERNAL

V2 = NATIONAL

HOW TO USE (30 SEC)

- 1 **Cover** → pick your 2 from Top 20 table (p.2)
- 2 **Combos** → choose 1 of 3 pre-built pairs (shared stack)
- 3 **Theme/Org** → hedge with same-mentor backup
- 4 **Submit** → upload by 04 Sep 18:00 (internal), 14 Sep (national)

02 — HOW WE SCORED

Two lenses. One engine.

All 175 Software PS from `vedantchaIke36/sih2026_ps.json` (580KB) — text-derived 9 sub-scores from title + description + dataset_link + theme + org. No GPT. Rerun with `python3 /tmp/eval_v2.py`

v2 national vs v3 internal

Internal is 12 days before freeze — execution beats scarcity. So we re-weighted openly.

v2 national: $Q \times 0.40 + (10 - \text{CLS}) \times 0.25 + \text{Diff} \times 0.15 + \text{Data} \times 0.10$
v3 internal: $Q \times 0.50 + (10 - \text{CLS}) \times 0.10 + \text{Diff} \times 0.20 + \text{Data} \times 0.10 + \text{Demo} \times 0.05 + \text{MFit} \times 0.05$ both

THE PARADOX — EXPLAINED

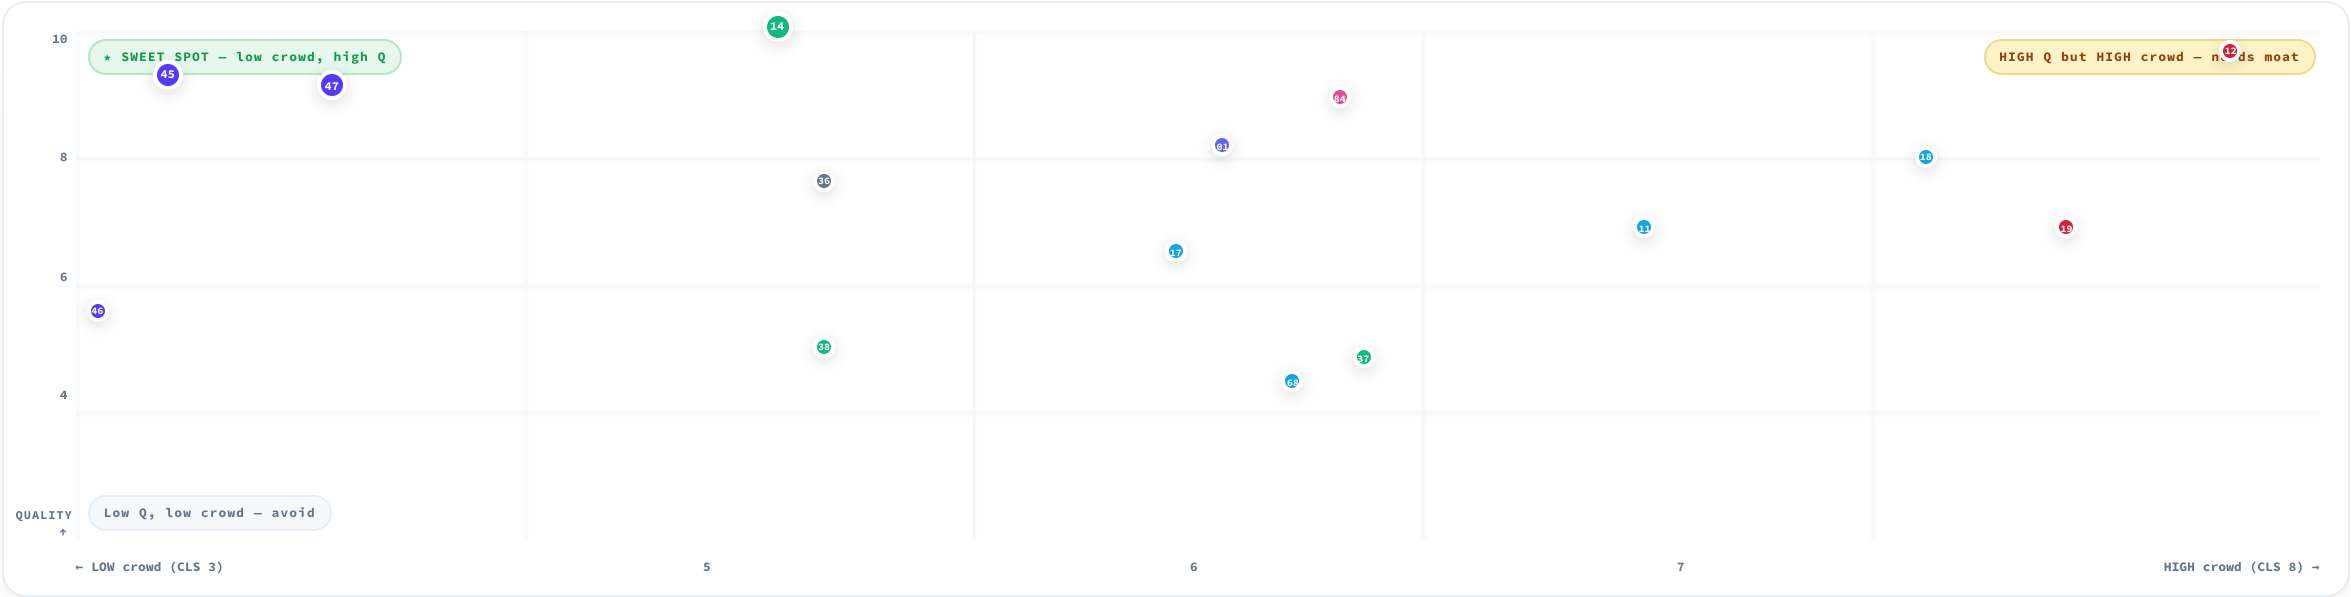

v3 adds **+24 WORKABLE** (13→37) not because PS got better, but because **CLS weight halved 0.25→0.10**. For 05 Sep internal, **crowd doesn't matter yet** — execution does. Nationally, it still matters (v2).

v3 = pitch Quality

v2 = survive freeze

08 - RISK x REWARD MAP

High quality, low crowd = **sweet spot**.

DO: CHASE TOP-LEFT
SIH26045 (3.35, 7.47), 26047 (3.85, 7.42), 26046 (3.55, 6.60) — Ayush trio sits alone in green zone. Same ministry, lowest CLS in 175.

AVOID: BOTTOM-RIGHT TRAP
SIH26012 CLS 8.20 Q 7.48 looks high-Q but needs 410/500. Without 500-cap moat you'll drown in OCR clones. Demo in 90s ≠ win.

WATCH: HIGH-LEFT = RARE
SIH26014 (5.00, 7.62) — highest Q in Top 20 but only MED crowd. Best risk-adjusted. If GIS lab available, it's #1 on merit.
